In sealed packets, 1*s.* each.

10 # KALANCHOE CARNEA.

AWARDED A FIRST-CLASS CERTIFICATE, ROYAL HORTICULTURAL SOCIETY, JANUARY 11th, 1887.

This strikingly beautiful decorative plant commences to flower at Christmas, continuing in bloom throughout January and February, its bright and pleasing colour being very attractive during these dull months, thus proving it a most welcome addition to the winter flora.

The plant was recently introduced from South Africa, is of easy culture, very floriferous, and succeeds well in a temperature of 50° to 55°; it attains a height of about 18 inches, and is of good bushy habit. The flowers, of wax-like consistency, are borne in large clusters, lasting a long time in perfection. They are of a beautiful delicate pink colour, and deliciously fragrant, thus greatly enhancing the value of this charming plant.

The above illustration is from the *Gardeners' Chronicle*.

1*s*. 6*d*. per packet.

11 # CYPERUS DISTANS.

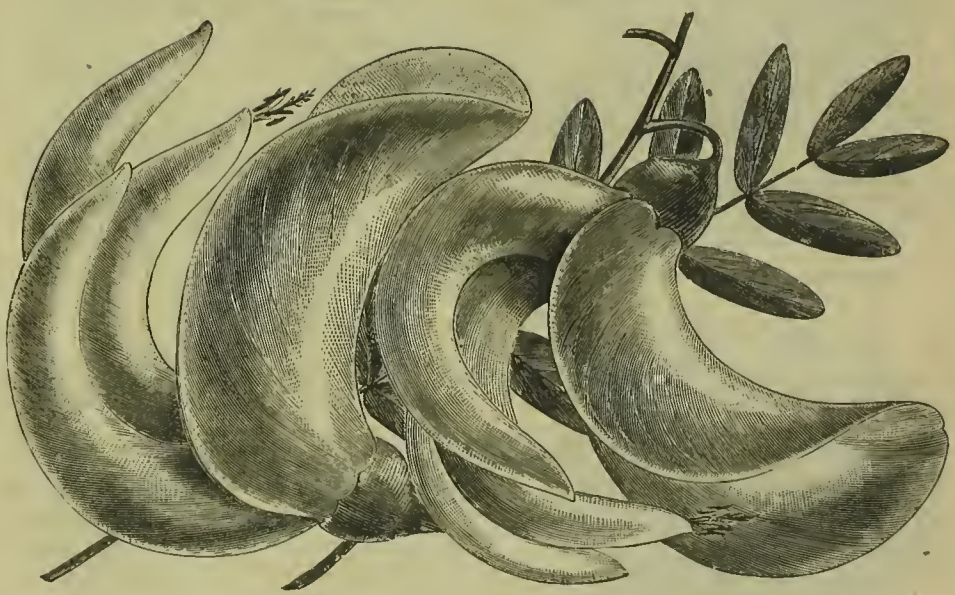
An exceedingly ornamental greenhouse foliage plant, producing clusters of stout erect growths crowned with whorls of broad dark green leaflets. This is of much nobler growth than the well-known and most useful *C. alternifolius*, and should be grown by everyone requiring a handsome and striking decorative plant. 2*s*. 6*d*. per packet.

12

ARISTOLOCHIA ELEGANS.

Mr. W. B. can now offer seed of this beautiful free-flowering, neat-growing species. Its handsome and elegant flowers are borne on long stalks and have a slightly distended tube, which is suddenly bent upwards, the upper part dilated into a cordate cup-shaped limb of a rich dark purple colour, ornamented throughout with irregular branched markings of a creamy white, and having a golden yellow eye surrounded by rich velvety purple. Its blossoms are produced in the greatest profusion, even on small plants, and are entirely free from the objectionable odour peculiar to the genus. It has been certificated by the Royal Horticultural Society, and is described and figured in the *Gardeners' Chronicle* for September 5th, 1885.

In sealed packets, 3*s*. 6*d*. each.



13

SESBANIA GRANDIFLORA.

The gigantic and magnificent white flowers of this attractive plant are produced in axillary racemes, each raceme having usually four of its immense flowers, which individually are about three inches long. It has been introduced from Western Australia, and is, therefore, well adapted for greenhouse or conservatory decoration. The plant has elegantly pinnate leaves. Price, 2*s*. 6*d*. per packet.

14

ASTER "TRIUMPH."

ASTER "TRIUMPH."

This splendid Aster is undoubtedly the most beautiful and perfect of all Dwarf Asters. In its earlier growth it resembles in habit somewhat the Dwarf Chrysanthemum-flowered section: but, in developing its large, handsome and beautifully-shaped flowers, it assumes quite another aspect. The individual flowers measure from 2½ in. to 3 in. in diameter, and are of the most faultless Pæony-form, all petals being beautifully incurved. The colour is peculiarly rich and brilliant; when beginning to flower it is a pure scarlet, which, when in full bloom, changes to a magnificent lake-crimson. It produces its flowers in great abundance, making it extremely useful for borders, groups, or pot culture.

1*s.* 6*d.* per packet.

GODETIA "FAIRY QUEEN."

15

GODETIA "FAIRY QUEEN."

This handsome and charming new variety is of very dwarf habit and compact growth, which admirably adapts it for use in beds and borders. The flowers are white passing into blush, with large carmine spots at the base of each petal. The individual blossoms of this most desirable acquisition are large and attractive, of the same size as those of *G. Lady Albemarle*.

1*s.* 6*d.* per packet.

LUPINUS ALBO-COCCINEUS NANUS.

16

LUPINUS ALBO-COCCINEUS NANUS.

This ornamental and free-flowering plant is of very dwarf growth, forming handsome compact bushes, about one foot in height by the same in breadth, bearing its pretty and deliciously-fragrant spikes of bloom well above the foliage. The lower half of the flower-spikes is of a rich rosy-crimson colour, the upper portion being white.

6*d.* per packet.

17 LOBELIA ROYAL PURPLE.

Certificated by the Royal Horticultural Society, May 26, 1885.

In colour this fine Lobelia is quite different from any other variety in commerce, being a very rich shade of violet purple without any trace of blue, as in all other sorts, and is very striking and effective, thus showing off its large and clear white eye.

The habit is semi-compact, not so much so as the "pumila" varieties, but not at all straggling.

1*s.* 6*d.* per packet.

18 PAPAVER MARSELLI—THE MIKADO.

FRINGED JAPANESE POPPY.

This quaint and charming Poppy has been introduced from Japan, and is, without doubt, one of the most beautiful species of the genus. The petals of the flower, which is semi-double, are cut and fringed in the most elegant manner. The colour is most attractive, being pure white at the back whilst the fringed edges are of the most brilliant crimson scarlet. 6*d.* per packet.

19 PAPAVER PAVONINUM.

PEACOCK POPPY.

A very free-flowering and beautiful new single-flowering Poppy of dwarf habit. The colour is brilliant scarlet, each petal being marked near the base with a glossy black zone, forming a complete ring, in admirable contrast to the bright ground colour. 6*d.* per packet.

PAPAVER LÆVIGATUM.

20 ## PAPAVER LÆVIGATUM.

This new and showy annual has been introduced from Persia. It grows about 2 feet high, and produces in great abundance finely-shaped large flowers about 4 inches in diameter; these are of a brilliant deep scarlet, a black blotch at the base of each petal being surrounded with a white margin, producing a striking and novel appearance. The flowers are also of great persistence, lasting in blossom (even in a cut state) for several days. The two outside petals are double the size of the inner ones, giving to the flowers a cup-shaped appearance. Very free flowering and extremely showy. The seeds are of slow germination. 1*s.* 6*d.* per packet.

ICELAND POPPIES.

These Poppies range in colour from the purest satiny white and yellow to the deepest glowing orange-scarlet, and have a delicious lilac-like fragrance, the flowers being produced in never ceasing succession from the beginning of June to October. Not only are these Poppies attractive in the garden, but for elegance in a cut state they are simply unsurpassed, lasting quite a week if cut directly they are open. They are offered in the following varieties:—

21 **PAPAVER NUDICAULE**, clear yellow. 6*d.* per packet.

22 **PAPAVER NUDICAULE ALBUM**, pure white. 1*s.* per packet.

23 **PAPAVER NUDICAULE MINIATUM**, brilliant orange-scarlet. 1*s.* per packet.

PRIMULA OBCONICA.

24 ## PRIMULA FLORIBUNDA.

A pretty greenhouse species, producing continuously an abundance of yellow flowers, which are borne in superposed whorls, on erect stems. It has been awarded a First-Class Certificate. 1*s.* 6*d.* per packet.

25 ## PRIMULA OBCONICA.

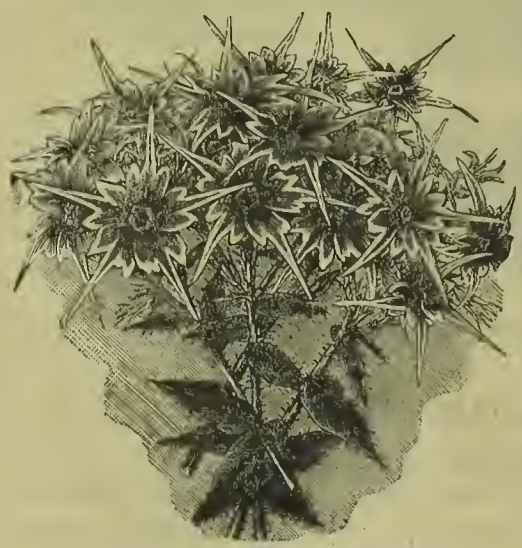
A pretty and interesting Primula, with flowers of a soft lilac shade of colour. It is a native of China, and in habit and foliage resembles the beautiful *P. cortusoides*, but differs in flowering continuously and profusely from Spring till Autumn, rendering it one of the most useful of Primulas for pot culture; it also succeeds admirably during the summer months in the open border. 1*s.* per packet.

26 PHLOX DRUMMONDII FIMBRIATA.

PHLOX DRUMMONDII FIMBRIATA.

This, and the followiug novelty, initiates a new and pleasing departure from the old type of Phlox Drummondii, both varieties having become thoroughly fixed in character after several years' cultivation. It grows about twenty inches in height and produces in an umbellate form its elegant and attractive flowers in the most abundant manner. The blossoms are of medium size, and the petals, instead of being entire, are in this variety partly fimbriate, partly three-toothed, the centre tooth being almost twice as long as the lateral ones, all distinctly bordered with white, forming with the bright eye and the various colours of the flowers—such as blue, red, scarlet, blue-marbled, red-marbled, violet-red, purple, salmon-red and rose—a most charming contrast. A First-class Certificate of Merit has been awarded to this novelty. Mixed Seed, all colours, 1*s.* per packet.

27 PHLOX DRUMMONDII CUSPIDATA.



PHLOX DRUMMONDII CUSPIDATA.

A very striking novelty of extraordinary character, selected from Phlox Drummondii fimbriata. The growth is generally four inches dwarfer and the habit more compact than that variety; the chief difference, however, consists in the flowers, the centre petals, which are five in number, being much elongated, from four to five times the length of the lateral ones, thus giving the flowers a most distinct and regular star-like appearance, their attractiveness being greatly enhanced by the broad white margins which border the edges of the petals. It has been awarded a First-class Certificate of Merit. This is supplied in the same beautiful colours as the variety "fimbriata." All colours, finest mixed, 1*s.* per packet.

28

ROMNEYA COULTERI.

A stately growing evergreen perennial from California, which has proved hardy in favourable situations in this country, blooming continuously from the end of June to the end of September. It is of imposing appearance, the flowers being of immense size, often exceeding 6 inches in diameter. The petals, which are pure white, are of a peculiar delicate texture, scarcely opaque, and yet enduring in a good state for many days, their fragrance being equally delicate, resembling somewhat that of a Magnolia. The crown, or centre of the flower, is composed of a cushion of golden-yellow anthers, greatly adding to its appearance. The glaucous foliage is deeply cut like that of an *Eschscholtzia*, and is persistent throughout the winter. 1*s.* 6*d.* per packet.

29

VERBENAS, NEW MAMMOTH.

VERBENA, NEW MAMMOTH.

A greatly improved strain of Verbenas from America, the plants being of sturdy vigorous habit and yielding a profusion of immense trusses of flowers, of all the colours known in this useful section of bedding plants, each flower being larger than a shilling piece. This great improvement in size is certain to increase in a very large measure the popularity of these charming flowers, this new strain being altogether distinct and surprisingly beautiful. The colours present the same wide range as the ordinary type. 1*s.* per packet.

30

ZEA GRACILLIMA VARIEGATA.

NEW STRIPED MAIZE.

This elegant variety is much superior to the old type *Zea japonica variegata*, being more compact in habit, whilst its numerous long, drooping, graceful leaves are striped in the prettiest manner, rendering it most useful as a decorative plant for the open border. 6*d.* per packet.

SEEDS FROM PRIZE STRAINS.

CALCEOLARIA.

31. **CALCEOLARIA HERBACEOUS, Bull's Prize Strain.**—With the greatest confidence Mr. W. B. recommends the above magnificent strain; the Seed has been saved from a collection of the most beautiful and varied flowers, of excellent form and substance, and including almost every shade of colour, exquisitely spotted and blotched, the foliage retaining a healthy green colour throughout the season. 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

CALCEOLARIA.

CINERARIA.

CINERARIA.

34. **CINERARIA HYBRIDA GRANDIFLORA NANA.**—Splendid dwarf variety, with large flowers of many beautiful colours and shades. 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

PRIMULAS.

Special Offer of Seed from Prize Strains.

35. **PRIMULA SINENSIS FIMBRIATA ALBA.**
36. **PRIMULA SINENSIS FIMBRIATA RUBRA.**
37. **PRIMULA SINENSIS FIMBRIATA MIXED.**

Mr. WILLIAM BULL has the greatest confidence in offering seed of the above, knowing that the produce cannot be excelled, it having been saved from the finest strains in cultivation, the flowers being remarkable for size, brightness of colour, and substance, while in general habit the plant leaves nothing to be desired. 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

PRIMULA SINENSIS FIMBRIATA.

38. **"BULL'S PREMIER MIXTURE."**

Seed of Mr. WILLIAM BULL'S select strain is now offered in mixture, containing all the new and most distinct colours and varieties; the many unsolicited testimonials received, point conclusively to the fact of its being appreciated as of unusual excellence. To distinguish this from the ordinary mixture of *P. alba* and *rubra* generally supplied, Mr. W. B. designates this choice mixture as above. 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

FERN-LEAVED PRIMULAS.

39. **PRIMULA SINENSIS FIMBRIATA FILICIFOLIA ALBA.**
40. **PRIMULA SINENSIS FIMBRIATA FILICIFOLIA RUBRA.**
41. **PRIMULA SINENSIS FIMBRIATA FILICIFOLIA STRIATIFLORA.**
42. **PRIMULA SINENSIS FIMBRIATA FILICIFOLIA MIXED.**

The above beautiful varieties of the Fern-leaved section possess most elegantly fringed edges, and will be found all of superior merit and unsurpassed excellence. 1s. 6*d.* and 2*s.* 6*d.* per packet.

PRIMULAS, CHOICE NAMED.

The following beautiful varieties are specially recommended :—

43. **PRIMULA SINENSIS FIMBRIATA MONT BLANC.**—Unrivalled in the pureness of its snowy white densely fringed flowers, which are of great size and substance. 2*s.* 6*d.* per packet.

44. **PRIMULA SINENSIS FIMBRIATA SPLENDIDA.**—The flowers of this magnificent strain are purple crimson; beautifully fringed, and of immense size and substance. 2*s.* 6*d.* per packet.

45. **PRIMULA SINENSIS FIMBRIATA ALBA OCULATA LUTEA.**—A distinct variety; splendidly fringed white flower, with large bright-yellow centre, which extends to half the flower; a remarkably handsome variety. 2*s.* 6*d.* per packet.

46. **PRIMULA SINENSIS FIMBRIATA, CHISWICK RED.**—Brilliant scarlet carmine. 2*s.* 6*d.* per packet.

47. **PRIMULA SINENSIS FIMBRIATA FULGENS,**—A beautiful new Chinese Primula; the flowers are large, of good substance, and elegantly fringed, the colours being very bright scarlet carmine with small yellow eye. 3*s.* 6*d.* per packet.

228. **PORTULACA GRANDIFLORA FL. PL., extra choice mixed colours.**—A very desirable double-flowered species, of dwarf compact habit, producing large brilliantly coloured flowers, including golden-yellow, purple, scarlet and white varieties. 6*d.* per packet.

PORTULACA, Assortments.—*Vide* page 30.

229. **PRIMROSE POLYANTHUS, choice mixed.**—The characteristic feature in this beautiful race of Spring flowers is that, early in the Spring the plants have the solitary flowers of the primrose, and later on the bunch flowers of the Polyanthus. 1*s.* per packet.

PICOTEE.

PRIMULA FLORIBUNDA.—*Vide* page 6.

PRIMULA OBCONICA.—*Vide* page 6.

230. **PRIMULA JAPONICA.**—A Primula a foot and a half high, bearing 4 or 5 separate whorls of flowers, each flower nearly an inch in diameter, and of a splendid magenta colour, and the plant, moreover, perfectly hardy. 6*d.* per packet.

231. **PRIMULA ROSEA.**—A very desirable hardy species from the Himalayas. Of free growth and vigorous habit, it succeeds in almost any situation, producing in the most profuse manner its heads of clear bright rose flowers. 1*s.* per packet.

PRIMULA SINENSIS FIMBRIATA.—Of sorts, *vide* pages 10 and 11.

232. **PYRETHRUM, from fine double varieties.**—The value of these highly decorative plants can scarcely be over-estimated. 1*s.* per packet.

233. **PYRETHRUM AUREUM (Golden Feather).**—Its elegant feather-like golden leaves make it an effective plant for bedding or ribbon decoration. 6*d.* per packet.

234. **PYRETHRUM AUREUM SELAGINOIDES.**—A distinct form of *Pyrethrum aureum*, of dwarf and compact habit, the flat foliage resembling fronds overlaying each other, which gives the plants a fine level appearance. 1*s.* per packet.

235. **RHODANTHE MACULATA FLORE PLENO.**—A very elegant and pretty everlasting, flowers are of a bright rosy-carmine colour; admirably adapted for pot culture. 1*s.* per packet.

RESEDA ODORATA.—*Vide* Mignonette, pages 19, 20 and 35.

236. **RICINUS ELEGANTISSIMUS.**—A bushy-growing variety of the Castor Oil Plant, attaining a height of from 4 to 5 feet. The stems are dark reddish brown. It is exceedingly effective for sub-tropical gardening. 6*d.* per packet.

ROMNEYA COULTERI.—*Vide* page 8.

SALPIGLOSSIS, Assortments.—*Vide* page 30.

237. **SALVIA PATENS.**—Lovely deep blue flowers. 1*s.* per packet.

238. **SALVIA RUBESCENS.**—A handsome hardy annual, producing spikes of dark reddish purple flowers, the lip or lower petal being white. 1*s.* per packet.

SCABIOUS, Assortments.—*Vide* page 30.

239. **SCHIZANTHUS PINNATUS ROSEUS.**—The flowers of this really beautiful annual are of a delicate rose, shading off at the centre to white, the upper petal being almost entirely covered with a blood-red spot. 6*d.* per packet.

240. **SENECIO SPECIOSUS.**—The exceedingly bright and pretty magenta-coloured flowers of this plant make it very attractive; planted in the open air, its flower-spikes are successively produced from Spring until the end of Autumn. 1*s.* per packet.

SESBANIA GRANDIFLORA.—*Vide* page 3.

241. **SILENE PENDULA COMPACTA.**—A compact-growing form of the well-known *Silene pendula;* flowers of the same size and colour as the type. 3*d.* per packet.

242. **SILENE PENDULA COMPACTA ALBA.**—In habit same as above; flowers white. 3*d.* per packet.

243. **SILENE PENDULA COMPACTA ROSEA FLORE PLENO.**—This double-flowering variety is of very compact growth, and its flowers, which are produced in the greatest profusion, are very double and of very long duration, rendering it far more valuable for bedding purposes than any of the old single varieties. 6*d.* per packet.

244. **STATICE SUPERBA.**—A new and beautiful species, with denticular foliage, producing most handsome spikes or plumes of flowers, varying in colour from pure white to deep rose. Each plant produces a large number of these spikes or plumes, growing from 18 inches to 2 feet in height, every spike being composed of from 60 to 80 smaller plumes, rendering it most effective, either planted singly or in groups. 1*s.* per packet.

245. **STATICE SUWOROWI.**—The branching flower-spikes are of a very bright rose, shaded with crimson, and as each plant produces from 10 to 15 of these, measuring from 12 to 18 inches each, they form striking objects. 1*s.* per packet.

STOCK, DOUBLE GERMAN (Finest Imported).—In collections.—*Vide* pages 27 and 28.

246. **STOCK, EAST LOTHIAN, CRIMSON.**—The flowers of this intermediate variety are of the most beautiful crimson colour. 1*s.* per packet.

247. **STOCK, EAST LOTHIAN, PURPLE.**—1*s.* per packet.

248. **STOCK, EAST LOTHIAN, SCARLET.**—1*s.* per packet.

249. **STOCK, EAST LOTHIAN, WHITE.**—1*s.* per packet.

The above four beautiful varieties are remarkable for brilliancy of colour in the three former and purity in the latter. The flowers are very double, and produced on immense spikes.

250. **STOCK, PERPETUAL TEN-WEEK, PRINCESS ALICE.**—This most desirable novelty is especially valuable for cut flowers, producing its snow-white blooms in uninterrupted succession from May until November. It is particularly suited for border cultivation, and is equally recommended for pot culture. *Vide illustration.* 1*s.* per packet.

251. **STOCK, PURPLE BROMPTON.**—From an unrivalled strain. 6*d.* per packet.

252. **STOCK, SCARLET BROMPTON.**—A magnificent strain. 6*d.* per packet.

SWEET PEAS, ECKFORD'S NEW.—*Vide* page 1.

253. **SWEET WILLIAM, AURICULA-EYED.**—Beautifully coloured smooth-edged flowers, produced in immense trusses. 6*d.* and 1*s.* per packet.

NEW SNOW-WHITE PERPETUAL TEN-WEEK STOCK, PRINCESS ALICE.

254. **TACSONIA IGNEA.**—Beautiful scarlet, splendid variety. 1*s.* per packet.

255. **TACSONIA INSIGNIS.**—A robust-habited and free-blooming evergreen climber, producing on long pendent stalks large flowers of a luminous crimson colour, which change after gathering to a violet-rose. 1*s.* 6*d.* per packet.

256. **TACSONIA VAN VOLXEMI.**—This beautiful climber flowers most abundantly, and for almost the whole year; the large flowers are of the richest scarlet. 1*s.* per packet.

257. **TORENIA BAILLONII.**—A very pretty and distinct species, bearing bright yellow flowers, with a purplish-brown tube. 1*s.* per packet.

258. **TORENIA FOURNIERI.**—A most charming half-hardy annual, bearing large sky-blue flowers with three spots of a dark indigo-blue and a bright yellow stain in the centre. 1*s.* per packet.

259. **TROPÆOLUM, KING OF TOM THUMBS** (Scarlet).—A dwarf variety of bushy habit, bearing brilliant scarlet flowers and dark foliage. 6*d.* per packet.

260. **VERBENA HYBRIDA COMPACTA CANDIDISSIMA.**—An exceedingly dwarf and compact variety of this useful race of bedding plants, which cannot fail to become of the greatest value in decorating beds and borders. It comes nearly true from seed, the branches measuring scarcely half the length of the old variety, being of short vigorous habit, and forming a compact bush, about 5 inches in height, literally covered with umbels of beautiful white flowers. 1*s.* per packet.

VERBENA HYBRIDA COMPACTA CANDIDISSIMA.

261. **VERBENA, choice mixed.**—Saved from a splendid collection of the best named varieties. Great care has been taken that this seed should be saved from such as are really good bedding kinds, and of attractive colours. 1*s.* per packet.

262. **VERBENA HYBRIDA AURICULÆFLORA, choice mixed.**—This superb and distinct section produces beautiful flowers with large pure white eyes. 1*s.* per packet.

263. **VERBENA CARNATION STRIPED.**—This section may be expected to produce flowers variously striped, blotched, and spotted. 1*s.* per packet.

VERBENA, NEW MAMMOTH.—*Vide* page 8.

264. **VIOLA CORNUTA ALBA.**—Small pure white flowers; profuse bloomer. 6*d.* per packet.

265. **VIOLA CORNUTA, MAUVE.**—A fine variety for bedding. 6*d.* per packet.

266. **VIOLA LUTEA GRANDIFLORA.**—One of the most useful of all the yellow-flowering group of bedding Violas. 6*d.* per packet.

267. **VIOLA ODORATA, THE CZAR.**—A fine free-flowering variety, of robust habit, flowers very large; one of the best in cultivation. 6*d.* per packet.

268. **VIOLA TRICOLOR MAXIMA, EMPEROR WILLIAM.**—A large flowering variety, having blossoms of a splendid ultramarine-blue, with eye of purple-violet. 1*s.* per packet.

269. **WALLFLOWER, HARBINGER, an Autumn and Winter Flowering Variety.**—It continues in bloom during the Winter months (unless very cold), and thereby ensures cut blooms of this favourite flower when no other out-door, and but few greenhouse flowers can be had. The blossoms are of a rich dark red colour. 6*d.* per packet.

270. **WALLFLOWER, BELVOIR CASTLE, dwarf yellow.**—Dwarf compact habit; the bright yellow blossoms being large and well-shaped. 6*d.* per packet.

WALLFLOWER, DOUBLE GERMAN.—In collections.—*Vide* page 30.

ZEA GRACILLIMA VARIEGATA.—*Vide* page 8.

271. **ZINNIA DARWINII, mixed.**—Of dwarf compact-growing habit, and extremely free-flowering. 1*s.* per packet.

272. **ZINNIA ELEGANS ALBA FL. PL.**—A beautiful variety, producing magnificent double white flowers all through the season. 1*s.* per packet.

273. **ZINNIA ELEGANS PUMILA FL. PL.**—Dwarf and compact habit; flowers perfectly double and of brilliant colours. 1*s.* per packet.

ZINNIA ELEGANS Assortments.—*vide* page 30.

274. **ZINNIA HAAGEANA FL. PL.**—Brilliant orange flowers; full, double, and as regularly built as those of *Z. elegans fl. pl.* 1*s.* per packet.

275. **ZINNIA ELEGANS ROBUSTA GRANDIFLORA PLENISSIMA.**—A very fine novelty, and a great improvement on the old sorts of this favourite flower. It is a most robust grower, forming a handsome bush 3 feet or more in height, completely covered by its enormous flowers, measuring from 5 to 5½ inches across. The colours are also more beautiful and intense, some being perfectly dazzling. 6*d.* per packet.

COLLECTIONS & ASSORTMENTS OF EXTRA CHOICE FLOWER SEEDS.

Mr. W. B. begs to remark, that in making his selection of Asters and Stocks he has in every instance obtained from the best sources, and carefully selected only the most distinct colours, discarding all that are dull and ineffective, so frequently found in collections made up on the Continent.

COCKADE OR CROWN ASTER.

Sow Aster seed in April and May, in pans, or on a spent hot-bed in drills 6 inches asunder; when the plants are 1 inch high, prick out into a cold frame, or under hand-glasses, 3 or 4 inches apart, from whence they can be planted out when 4 inches high. Select showery weather for planting out, when the ground is in good working order; plant in rows 1 foot apart each way. To grow Asters to perfection, a rich soil is indispensable, and during dry weather they should be watered, and a top-dressing of well-rotted manure applied early in August.

STOCKS.

EAST LOTHIAN STOCK.

These Stocks are, without exception, the finest ever offered, the colours being crimson, scarlet, purple, and white, of remarkable brilliancy in the three former, and purity in the latter. The flowers are very double, produced on immense spikes.

* Hardy annuals most suitable for autumn sowing.

TIME OF SOWING.

HARDY ANNUALS may be sown in March and April, and for early spring blooming those marked with an asterisk should be sown early in September, in a sheltered situation, and when up, thinned so as to keep them strong. In March they may be transplanted where they are to bloom. Before sowing, which should be done on a fine dry day, carefully prepare the soil, and in covering, regulate the thickness by the size of the seeds—small seeds should be very lightly covered. Success in growing annuals depends in a great measure upon their being properly thinned to regular distances, so as to give plenty of room for the full development of each plant; this, in too many instances, is entirely neglected, hence the dissatisfaction so often expressed as to their use.

HALF-HARDY ANNUALS may be sown in March and April, in pans, placed on a slight hot-bed, and, when strong enough, pricked out into a cool frame near the glass, where they may get hardened and well established for transplanting into their blooming quarters early in May, or potted off singly for conservatory and greenhouse decorations. Under favourable circumstances many varieties will bloom freely if sown in the open ground about the middle of May.

TENDER ANNUALS such as Balsams, Celosias, Thunbergias, &c., require raising in a temperature ranging from 60° to 70°. Sow in pans or pots, and place near the glass; keep the soil moist, and shade from the sun until the plants appear. When strong enough, pot off into small pots, keeping them near the glass, and admitting air on every favourable occasion.

BIENNIALS AND PERENNIALS.—The more select and tender varieties for summer and autumn blooming may be sown in a gentle heat in March and April, and pricked out into pots until fully established, and then potted off singly, or transplanted into the open ground, as required. The hardier varieties may be sown in the open ground, in prepared beds, in June and July, and when strong enough transplanted into nursery beds, or where they are intended to bloom the following year.

SEED OF TOBACCO (Nicotiana).

Great interest now being taken in the growth of Tobacco, the following varieties are offered as the best in the market, having been carefully selected from the largest farms in the Southern States. They are supplied in packets bearing cultural directions.

Big Frederick, an old and favourite variety, with large broad finely shaped leaves.
Connecticut Seedleaf, one of the earliest, a very choice and select variety.
Hester, a new and excellent yellow variety, makes fine cigar stock, having size, shape, texture, and colour, besides ripening early.
Kentucky, the brightest of the yellow type, and earliest to ripen.
Maryland, fine for wrappers; long leaf and extra fine; a first-class variety.
Pennsylvania, later than "Connecticut," but larger and heavier.
Sweet Oronoko, makes, when sun-cured, the best natural chewing leaf.
Yellow Pryor, a general favourite with planters; commanding the highest price for shippers.

The Collection of 8 *varieties*, 2*s.* 6*d.*

CHOICE COLLECTIONS OF FLOWER SEEDS.

As in Flower Seeds new species or varieties and improved strains are being constantly imported, proved, or raised, and offered by Mr. William Bull, it naturally follows that giving mere names and descriptions convey in many instances but an inadequate idea of the desirability of some of the handsomest and best introductions. Collections of Flower Seeds are therefore made comprising the choicest strains of popular favourite flowers, and including selections of the best novelties.

Quality rather than quantity being especially considered—Mr. W. B.'s selections may safely be relied on in these Collections.

NOVELTIES IN VEGETABLE SEEDS FOR 1889,

OFFERED BY

WILLIAM BULL, F.L.S.

NEW CULINARY PEAS.

ECKFORD'S NEW CULINARY PEAS.

BARONESS (Eckford).

A splendid main crop wrinkled Pea, attaining a height of 4 feet, and bearing a profusion of large square-ended pods, filled with fine Peas of first-rate quality; it is of robust habit, with foliage of a bright green colour, being well calculated to withstand long periods of drought.

In sealed pint packets, 2*s*. each.

EMPRESS (Eckford).

Awarded a First-class Certificate by the Royal Horticultural Society.

A magnificent wrinkled main crop Pea, of robust habit and vigorous constitution, the growth reaching a height of about 5 feet. The pods, borne generally in pairs, are of large size, with square ends, and are well-filled with 6—7 very large Peas of a rich sugary flavour.

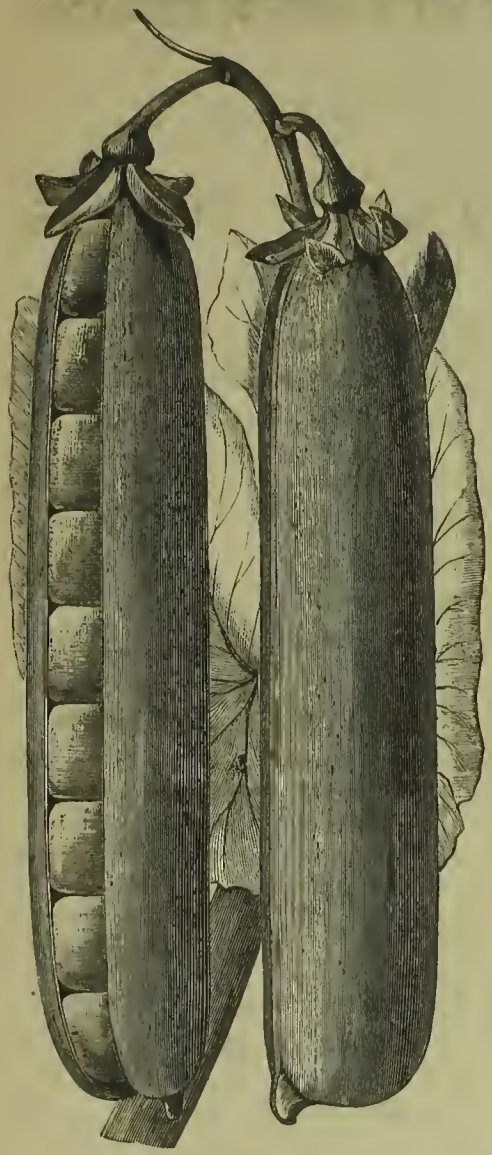
In sealed pint packets, 2*s*. each.

VULCAN (Eckford).

A fine dwarf late Pea, of good robust constitution and free branching habit, growing about 18 inches high, with very dark green foliage. The pods, which are remarkably well-filled, are produced in the most prolific manner, each containing 7—8 fine Peas of a bright green colour and delicious flavour.

In sealed pint packets, 2*s*. each.

ECKFORD'S NEW CULINARY PEAS.



DIGNITY (Eckford).

A magnificent main crop Pea, of robust growth, freely producing very long square-ended pods, containing about 8 large wrinkled Peas of superior flavour. This is a grand Pea for exhibition purposes, and cannot be too highly recommended. It attains a height of 4 to 5 feet.

In sealed pint packets, 1/6 each.

MAGNIFICENT (Eckford).

Awarded a First-class Certificate by the Royal Horticultural Society.

A grand main-crop wrinkled Pea of robust habit, growing about 5 feet in height and producing in the most profuse manner, large square-ended pods, containing 6 to 8 fine Peas of a light green colour and delicious flavour.

In sealed pint packets, 1/6 each.

VICTOR (Eckford).

A dwarf second early Pea of robust growth, attaining a height of 2½ feet, the pods being most prolifically produced in pairs, each pod containing an average of 6 to 7 large wrinkled Peas of exquisite flavour.

In sealed pint packets, 1/6 each.

Respecting the above Peas, Mr. CHARLES PENNY, Gardener to H.R.H. The Prince of Wales, writes: "*Your new Peas are first-class in every particular, and I can confidently recommend them.*"

DUKE OF CONNAUGHT (Eckford).

A most excellent, distinct, main crop wrinkled Pea, attaining a height of 4 to 5 feet, producing in the most abundant manner long, square-ended, bright green pods, well filled with 7 or 8 large Peas of very superior flavour. It is a magnificent variety for exhibition. As a proof of its great superiority, this Pea was, after trial at Chiswick, awarded a First-class Certificate.

In sealed quarts, 2/- each.

PROGRESS (Eckford).

A splendid late variety, growing to a height of 5 feet, very vigorous and productive, bearing a profusion of dark green pods of medium size, well filled with 7 or 8 bright green Peas of excellent flavour. This extremely prolific wrinkled variety can be strongly recommended as a marked advance on those already in cultivation, and is very handsome for exhibition purposes.

In sealed quarts, 2/- each.

SELECT GENERAL LIST OF VEGETABLE SEEDS.

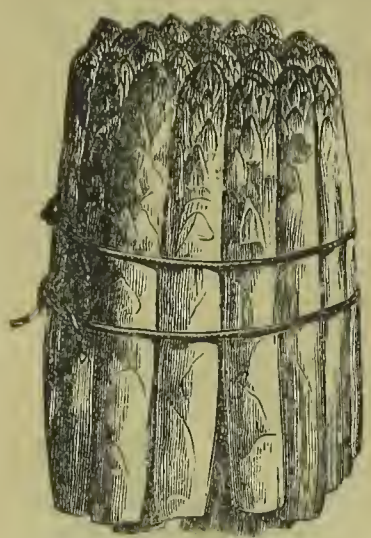
In the following General List of Vegetable Seeds, MR. WILLIAM BULL has excluded all varieties of doubtful origin and quality, only the most distinct and useful varieties in each section being quoted. The Stocks of all seeds have been carefully selected from the most eminent cultivators at home and on the Continent, and their growth having been effectually tested, they are confidently offered as being the very best that can be procured.

ARTICHOKES.

	Per oz.—*s.*	*d.*
GREEN GLOBE	1	0
PURPLE GLOBE	1	0

Sow in April in rich soil, and transplant when strong. In making a plantation, procure in March well-rooted suckers, trim the straggling tops and roots, but do not shorten the perfect leaves; plant in rows 4 feet apart, and 30 inches from plant to plant.

ASPARAGUS.



ASPARAGUS, CONNOVER'S COLOSSAL.

	Per oz.—*s.*	*d.*
COLOSSAL (*Connover's*)	0	4
READING GIANT or BATTERSEA per lb., 4*s.*	0	4

During the third week in March, sow the seed in drills 12 or 15 inches apart, on well-drained light ground that has been heavily manured the previous autumn; the seed may be covered to the depth of half an inch; when the plants are up thin out to 6 inches apart.

BEANS.

	Per qt.—*s.*	*d.*
DWARF GREEN GEM (*Beck's*), 1 foot high, branching habit, and abundant cropper	1	3
EARLY LONG-POD, a good early sort	0	8
EARLY MAZAGAN, very hardy, best for early crop	0	6
GREEN LONG-POD NONPAREIL, early	0	10
MONARCH LONG-POD, large, an excellent bearer	0	8
SEVILLE LONG-POD, an excellent early variety	1	3
WONDERFUL LONG-POD (*Johnson's*), very prolific	0	9
WINDSOR, BROAD, IMPROVED, pods broad and short; is considered the best for summer crop	1	0
WINDSOR, GREEN, rather smaller than the preceding, but of a deep green colour	1	3

For successional and main crops, sow in February and every month until June. The later kinds should be planted in drills 3 inches deep, 4 to 6 inches apart in the rows, the rows to be 3 feet apart. A deep strong tenacious soil is most suitable, trenched 2 feet deep, and liberally manured.

BEANS, FRENCH or KIDNEY.

	Per qt.—*s.*	*d.*
CANADIAN WONDER, extremely prolific variety for general crop	2	0
DARK DUN or LIVER-COLOURED, long podded; an abundant cropper	0	9
FULMER'S FORCING, an excellent variety	1	6
NEGRO LONG-PODDED, very productive for general crop	1	6

PALE DUN or CREAM COLOURED, early and prolific, excellent for general crop	0	10
SION HOUSE, suitable for out-door culture or early forcing	1	6
SIR JOSEPH PAXTON, excellent for forcing	1	0

For open ground crops sow the beginning of May to the end of June for succession. The situation should be open, the soil free-working, moderately manured; the drills should not be less than 2 feet apart, 2 inches deep, and Beans placed at regular distances not exceeding 4 to 6 inches.

BEANS, CLIMBING or RUNNING.

	Per qt.—s.	d.
CHAMPION SCARLET RUNNERS, a fine variety, producing very large pods	1	6
PAINTED LADY or YORK and LANCASTER, scarlet and white flowers	1	3
SCARLET RUNNERS	1	3

These are planted in the open ground in rows 3 or 4 feet apart, about the beginning of May. When 3 inches high, earth up and stake; the stakes to be about 8 feet high, and when the plants have reached the required height, they should be stopped to cause them to produce laterals.

BEET.

	Per oz —s.	d.
DELL'S DWARF BLACK-LEAVED, excellent for decoration or culinary purposes	1	3
EGYPTIAN DARK RED, Turnip-rooted, rich dark red	1	0

ROSETTE COLEWORT, an excellent variety, producing small dark green heads	0	9
SUGARLOAF, a good old variety	0	6

For spring use sow about the middle of July, and again early in August; when the plants are strong enough plant out into rows 18 *inches apart, and* 12 *inches from plant to plant. For summer and autumn use, sow in February and March, and at intervals during spring.*

CAPSICUM.

	Per pkt.—s.	d.
GOLDEN DAWN, fruits very mild and of a bright golden yellow	0	6
CAYENNE, *true*, very small, red	0	6
CHILI, small red	0	6
LONG RED	0	6
LONG YELLOW	0	6
PRINCE OF WALES, yellow, a charming plant for decoration	0	6

Sow in heat early in March, and when the plants are an inch high prick out two or three into each pot, to be gradually hardened off in a cool greenhouse or frame; they may be either potted singly into 6-inch pots, or planted out in a warm sheltered border composed of rich soil. In a greenhouse amongst other plants their brilliant-coloured fruits and green foliage present a gay appearance.

CARROT, LONG RED SURREY.

CARDOON.

	Per oz.—s.	d.
LARGE SPANISH	0	10

The ground upon which Cardoons are to be grown should be deeply trenched and liberally manured. Sow the seed in April, in rows 4 feet apart, and when up, thin out singly 12 to 18 inches apart. Before earthing up as for Celery, which should be done on a dry day, tie up and surround each plant with straw to keep the soil from contact with the sides. In dry weather give plenty of water.

CARROT.

	Per oz.—s.	d.
EARLY FRENCH or DUTCH HORN, very sweet, early and best for forcing	1	0
EARLY NANTES, an excellent early variety, of fine quality, with very small core; roots of medium size and somewhat stump-rooted	0	6

SCARLET PREMIER, a distinct variety, weighing from 5 to 8 lbs., flesh very solid, thick, rich, and melting; beautifully netted, and of exquisite flavour 1 0
SUTTON'S BENHAM PARK, a oval green flesh, slightly netted, with very thin rind; flesh deliciously melting, and good in flavour. First Prize, Sutton, 1887.. .. .. .. 1 6
VICTORY OF BATH (*Gilbert's*), green flesh, fine flavour, handsome fruit 1 0
WILLIAM TILLERY, green flesh, fruit oval-shaped, evenly ribbed, beautifully netted, and of delicious flavour; received a First Class Certificate 1 0

In growing Melons the general treatment is very similar to that recommended for Cucumbers. A constant and regular temperature of from 70° to 75° should be maintained, and great attention paid to stopping, training, and thinning, and every care taken to guard against Red Spider and Thrip, to which Melons are liable.

WHITE LISBON, a mild flavoured variety, sown in autumn for spring use	0	6

As early in March as the soil is in working order, commence operations by levelling the ground with a rake, and tread it firmly; draw shallow drills 9 inches apart, along which sow the seeds thinly and regularly. Cover the seeds with fine soil, pressing it down on the drills or beds by the use of a light roller or the back of a spade. When the young plants are strong enough, thin them gradually so that they stand, after the final thinning, 5 or 6 inches apart.

ROUND or SUMMER	,, 2*s.*	0 3

The round variety should be sown at intervals from March to June, to ensure a constant supply during the summer. The prickly or triangular-leaved sort is usually sown about the end of July or beginning of August for winter use, in drills 1 foot apart. New Zealand Spinach *is a useful and excellent vegetable, and should be raised in a gentle heat in March, and transplanted in May or June 3 feet apart each way, into rich light soil.*

TOMATO or LOVE APPLE.

NEW TOMATO, MIKADO.

The fruits of this desirable variety grow to a large size, frequently weighing as much as a pound and a half each, and are of good flavour. The foliage is distinct, being whole or entire, instead of cut or serrated as in nearly all other sorts. 1*s.* per packet.

"PEN-Y-BYD," new. This distinct and desirable variety is very prolific. The fruit is almost globular in form, about 6 inches in diameter, and of a delicate creamy white colour, with thick firm flesh, of finest quality. Awarded a First Class Certificate by the Royal Horticultural Society	1	0
VEGETABLE CREAM (*Moore's*), an excellent variety	0	6

Sow in April in pans, and place on a gentle bottom heat; when up and strong enough to handle, pot off. When fully established harden off, and about the middle of May they can be planted out, taking the precaution to protect by means of hand-glasses for a short time. Marrows like a deep short soil, and it is advisable to prepare places to plant in, by digging holes sufficiently deep to hold two or three barrow-loads of well-decayed manure, over which place soil 9 inches deep.

MISCELLANEOUS BULBOUS AND TUBEROUS-ROOTED PLANTS.

BEGONIAS.

HANDSOME-FLOWERED TUBEROUS-ROOTED SECTION.

The immense size to which the flowers of this popular race of plants have now attained considerably enhances their value for decorative and bedding purposes; indeed, it can scarcely be over-estimated. Of nearly every shade of colour, from deepest crimson-scarlet to white, the blooms are produced in the utmost profusion, thus rendering them extremely showy and attractive. Selections of good single-flowering varieties can be made by Mr. W. B. at 18*s.*, 30*s.*, and 40*s.* per dozen. **Varieties with double flowers, 3s. 6d., 5s., and 7s. 6d. each.**

MIXED SEEDLINGS—UNNAMED.

Having been raised from the best varieties, among these will be found many very beautiful kinds of every shade of colour, and from the low price at which they are offered, are admirably adapted for planting largely in beds and borders. Blooming tubers, 6*s.* and 9*s.* per dozen; 2 and 3 guineas per 100.

Unnamed double and semi-double varieties, 12s. and 18s. per dozen.

AMARYLLIS IGNESCENS

This handsome and attractive variety, which is one of the showiest of the genus, has been imported from the United States of Colombia, and should be grown in a stove-house, with the same treatment as that usually accorded to its congeners. The flowers, which are bold and striking when fully expanded, attain a breadth of about five inches, and are of a light fiery orange red colour, stained at the base with pale green, forming a large greenish white eye or centre, in marked contrast to the remainder of the flower; the stamens are declinate, of the same colour as the perianth, with yellow pollen. It is of easy culture, and should be grown by everyone possessing a hot-house. 2*s*. 6*d*. and 3*s*. 6*d*.; 24*s*. and 36*s*. per dozen.

For other Amaryllis, vide page 71

CRINUM NOBILE.

A very fine new Crinum producing immense flowers, individually measuring about seven inches in diameter; they are of a creamy white colour suffused with purplish-rose on the outer halves of the petals, the same colour being more prominently shown on the exterior of the flowers. The blooms are produced in umbels on dark purplish-bronze scapes, springing from stout short-necked bulbs, the olive green leaves being about fifteen inches long by four inches broad, undulated and wavy at the margins. *10s. 6d.*

EUCHARIS MASTERSII.

A new and most desirable acquisition, the flowers being of snowy whiteness, freely produced and delicately scented. It has been introduced from the United States of Colombia. 2*s.* 6*d.* each; 24*s.* per dozen.

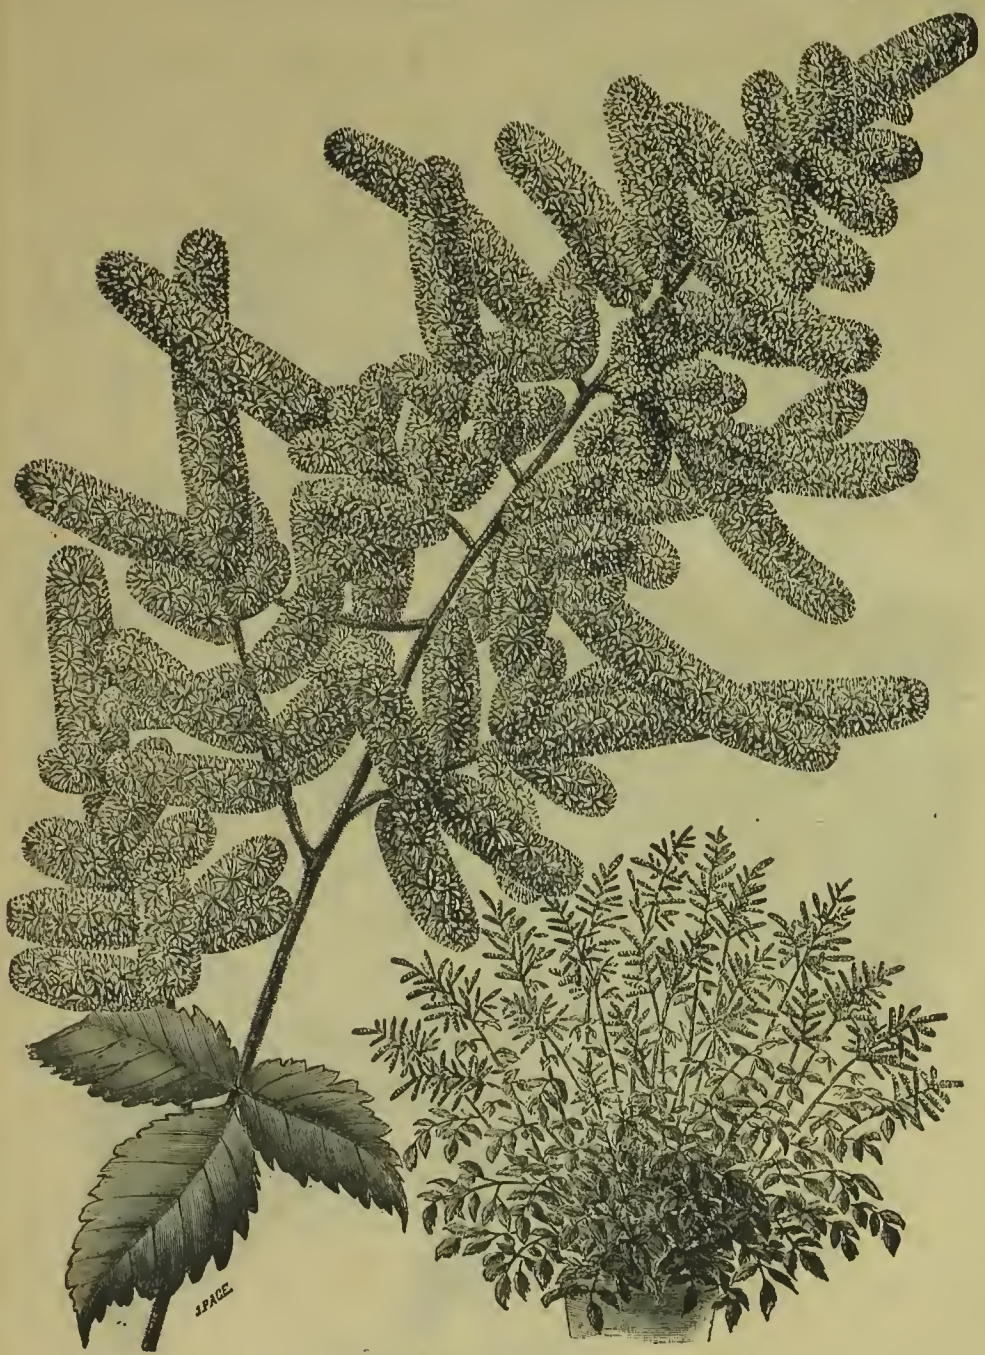
The pure white flowers of these beautiful plants are admirably adapted for cutting.

PANCRATIUM GUIANENSIS.

A very distinct species introduced from British Guiana, producing its elegant flowers in handsome clusters on erect scapes. The blossoms are pure white, the narrow segments being drooping and most prettily curled and twisted, presenting an aspect of the most charming description. The corona is trumpet-shaped, the filaments which proceed from it being bright green, and furnished with bright yellow anthers. 10*s*. 6*d*.



SPIRÆA ASTILBOIDES.

One of the most handsome of hardy herbaceous perennials, and one which has been certificated both by the Royal Horticultural and Royal Botanic Societies on account of its great merit. The stems are furnished with triternate leaves, and terminated by compound feathery branches of elegant white flowers. It will be a charming and indispensable plant for pot culture as a decorative object in the early spring months, on account of its free growth and beautiful flowers. *5s.*

For other SPIRÆAS, *vide* page 75.

CHOICE GLADIOLUS.

(HYBRIDS OF GANDAVENSIS.)

There are few flowers more showy and beautiful than the Gladiolus, and the varieties of the *Gandavensis* section are perfectly hardy and easily grown, whilst their erect and stately growth, and long spikes of flowers, developing themselves successively, never fail to win admirers.

To facilitate the cultivation of this highly-decorative plant, a few remarks may be necessary to some:—

The best and safest time for planting is from the beginning of April to the end of May, when a continuous bloom may be assured from July to September.

Soil is not much a point for consideration, so long as it is not stiff and consolidated; but it is important that it should be deeply dug previous to planting.

Large bulbs should be planted from 3 to 4 inches, and smaller bulbs 2 inches deep.

This beautiful tribe of plants should be largely planted everywhere, because—

They are perfectly hardy and easily grown.
They are gorgeously beautiful.
Their handsome spikes of flowers are useful for decorating vases and epergnes.
Their flower buds expand and last a long time when cut and placed in water.
They are charming when introduced into borders among Evergreens.
Planted by hundreds among Rhododendrons, they brighten and enliven the beds during the summer and autumn months.

Orders for the above are booked throughout the year at the following prices, and the bulbs supplied in January, February or March.

DOUBLE TUBEROSES.

(POLIANTHES TUBEROSA.)

The perfectly double flowers of *Polianthes* are well known for their delicious fragrance and pearly whiteness, being admirably adapted for Button-holes, Bouquets, &c.; indeed, are of the greatest value wherever cut flowers are required. By successional plantings these lovely flowers may be had all through the summer and autumn. They should be potted in rich loamy soil and started in a good bottom heat, being afterwards grown on in a stove, with plenty of moisture.

GLOXINIAS.

The handsome and showy flowers of these beautiful bulbous plants render them of the greatest value for the decoration of stoves and conservatories. Of easy culture, they can, with judicious treatment, be had in bloom at almost any season of the year; their attractive flowers, being of large size and good shape, are admirably adapted for cutting. The colours are most varied, every hue being pure and distinct, while some of the kinds are spotted and maculated in a most pleasing manner.

For names of choice varieties, see Mr. William Bull's Plant Catalogue.

Choice selections made by Mr. W. B. at 18s., 30s. and 42s. per dozen, according to sorts. New varieties, 5s. each.

Good blooming tubers, unnamed, of various colours, raised from handsome varieties, 9s. and 12s. per dozen; 50s. and 70s. per 100.

For Gloxinia Seed, *vide* page 18.

GLOXINIA INSIGNIS.—This distinct variety produces its flowers during the autumn and winter; colour, bluish lilac, with a large crimson blotch at the base of the tube 2*s.* 6*d.*

—— **MACULATA SCEPTRUM**, a magnificent hybrid, producing a rigid terminal inflorescence, exceeding 20 inches in height, which bears majestically its large, clear lilac, well-formed blooms. 2*s.* 6*d.*

GRIFFINIA HYACINTHINA.— A beautiful winter-blooming bulbous plant from Brazil, with elliptic-oblong leaves. The flower-scape is from a foot to a foot and a half high, and bears an umbel of about two dozen flowers, which form a spreading head some eight or nine inches across. The flowers, which are of a beautiful bluish lilac, lighter towards the base of the segments, remain for a considerable period in beauty. It is most valuable among our handsome flowering bulbous plants, especially on account of the exceptional colour of its charming flowers. 5*s.* and 7*s.* 6*d.*
